

Bridging the Gap Between IT and OT

Tekgem Bridge the Gap between IT and OT. Our proven credibility is aligned with industry regulators whom we work alongside closely. We act as an extension of our customer's team, giving back control so they can focus on what they do best.

Secure remote access to industrial networks using Multi Factor Authentication to authorised systems only.

Scan & block the transfer of malicious files over http(s), smb, ftp etc using built-in network based **antivirus**.

Protect unpatched systems against exploits that target network based vulnerabilities such as the RDP Bluekeep vulnerability using **IPS virtual patching**.

Detection with **real-time network security monitoring** by identifying potential malicious activity to alert & notify of cyber security incidents.

NGFW **industrial protocol protection** policies including MODBUS, OPC, PROFINET etc. to secure process comms and prevent unauthorised industrial communications.

Bridging the gap between Information Technology & Operational Technology

Customers that partner with us to secure their critical infrastructure
