ABOUT NEPIC

We cover a broad sweep of chemistry focussed industries including petrochemicals, polymers & materials, fine & speciality chemicals, pharmaceuticals, biotechnology and renewables.

Together with our member companies, we work to build upon the already powerful industrial base located here and make this region one of the most competitive and successful chemical-processing locations in Europe.

A stack of printed magazines is shown on the left side of the image. The top magazine is open, revealing a page with a vibrant, abstract pattern of yellow and green. In the background, a white bowl filled with a green, textured food item, possibly a salad or soup, is visible. The overall scene is set against a dark, blurred background.

PRINT

The most important benefit of print media is its tangibility. Among the reasons why many people prefer print is to do with the feel of the paper, having it in their hands means that the content is real, it exists.

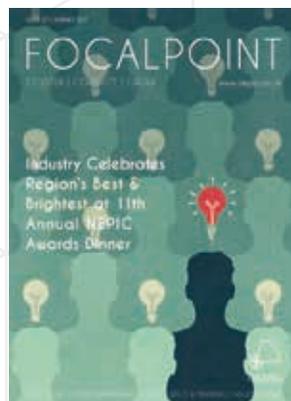

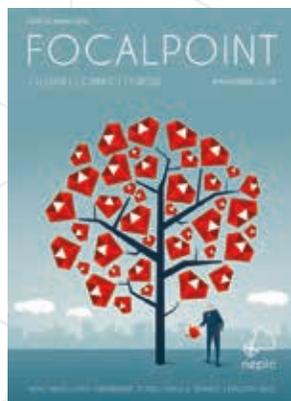

Through NEPIC's print publications, you can engage with and draw your customer in through attention-grabbing content before rewarding them with a worthwhile offer or service.

Targeted Email Marketing

Well crafted, targeted email marketing is so beneficial, there's almost no reason not to use the strategy. Through the creation of targeted messages to niche audiences, you can create relevant content in which the customer resonates, instilling both your message and, most importantly, your brand in a way that shows you value them.

NEPIC provide targeted email marketing for companies seeking access to North East England's chemical-processing industry and large associated supply chain. With a database of over 6,500 sector specific contacts, we provide our clients with a targeted advertising channel that will transport your message to the desks of the people you'd like to reach and engage.

Whether you are looking to develop relationships, raise brand awareness or promote a specific product, service or event, a targeted approach will make your email marketing work harder for you, allowing you to reap as much value as possible from your investment.

Our service includes database segmentation, set-up support and campaign analytics. To find out more about reaching potential customers with your marketing messages, contact a member of the team.
