

HIGH PERFORMANCE SUSTAINABLE COATINGS EFFECTIVE ASSET PROTECTION

Fast drying, environmentally friendly, water based coatings manufactured using a patented polymer design.

SK coatings offer considerable productivity gains. These coatings provide an increased level of protection from 2 applications compared to the traditional 3 coat alkyd system.

It is easy to over-coat with no shot blasting required and unlike other water based paints will be touch dry at 6°C and ready for over coating in under an hour.

Following impressive success in the Middle East and Asia, SK Formulations has named Rosh Engineering as the UK & Ireland appointed distributor.

Anticorrosion, Cold
Galvanizing & Electrical
Insulating Coatings
available

Unrivalled drying speed,
even when applied under
extreme conditions
(Up to 12x faster than
conventional systems)

Environmental,
Economic &
Performance Benefits

Specifications meeting
the ISO 129 44 standard

Single pack system,
reducing painting time,
cost of materials &
outage length
