## GRADUATES FIT FOR YOUR BUSINESS

Planning for the future of your business has never been so important. At Newcastle College University Centre we have an exciting opportunity for North East businesses to recruit from a highly-skilled digital technology and advanced manufacturing graduate talent pool, whilst also receiving a salary contribution of **£10,000**.

Our University Centre ethos is to produce work-ready graduates who have the hands-on experience to be able to make an impact in North East industry. This year we are supporting **9** funded internships, available across the **digital technologies** and **engineering** industries, and are offering businesses the opportunity to explore our **Stay and Succeed** scheme to see how your business can benefit.

### Stay and Succeed

Stay and Succeed is a unique internship project (funded by the Office for Students) which aims to implement strategic engagement to ensure North East graduates can access higher level employment in their home locality, contributing to regional industry and economy.

As part of this project, Newcastle College University Centre will make a £10,000 contribution towards an intern's salary for a 12-month internship.

## WHAT DEGREES ARE STUDENTS STUDYING?

Newcastle College University Centre graduates are completing the final year of the following programmes:

### Engineering

- BEng (Hons) Electrical Electronic Engineering
- BEng (Hons) Mechanical Manufacturing Engineering
- BSc (Hons) Engineering Management

### Digital Technologies

- BSc (Hons) Applied Computing
- BSc (Hons) Games Technologies

All of our degree courses are designed with industry meaning our programmes are fit to meet the demands and requirements of modern business.

### How much does the employer pay?

Interns are expected to be paid a minimum salary £20,000, of which Newcastle College University Centre will contribute £10,000. Employers may choose to pay more than the minimum requirement.

#### How long does it last?

Your intern will be employed by you for 12 months. Although not mandatory it is expected that your graduate will have made a significant contribution for an employer to consider permanent employment.

#### How many internships are available?

We have 9 funded internships on offer through our Stay and Succeed scheme.

#### Are there any off-the-job elements?

As part of the internship, we require the intern to provide 10 days of support to Newcastle College University Centre to discuss their work experience with current students and support project-research activities. This can be flexible around the needs of your business.

#### When do they start?

Our work-ready graduates are currently completing their studies and interns are due to begin in July – August 2021.

## WHAT ARE THE STEPS TO SECURING A GRADUATE?

1. Register your interest or request a call back by emailing [stayandsucceed@ncl-coll.ac.uk](mailto:stayandsucceed@ncl-coll.ac.uk) and when you're ready to proceed we'll send you an Internship Proposal Form to complete.
2. Newcastle College University Centre will select which internships to take forward through a competitive process based on the Internship Proposal Forms and employer discussions.
3. Meet our candidates - we'll set up virtual interviews around your schedule to help you make your selection.
4. We'll complete all relevant paperwork and your 12-month intern will start.

**Throughout the 12 month internship you'll have regular dialogue and support from Newcastle College University Centre.**

## WHAT OUR EMPLOYERS SAY

Daikin Applied currently have strong links with the education and training sector with an emphasis on workforce development with staff members completing further education courses through Newcastle College and other local training providers.

When we heard about the Stay and Succeed we were naturally interested in another avenue of bright talent to strengthen our current workforce.

At Daikin we have taken on three graduates, and I can categorically say that this programme has greatly benefited our business and made us aware of areas for improvement when organising placements of any nature, as well as upskilling the graduates in areas they required to slot into the job roles given. Subsequently, we have offered all three of our graduates full time permanent contracts.

I'm sure employers and students alike will reap the benefits of this project with each year it continues and encourage industries to use this as a tool to gain more knowledgeable skilled workers of tomorrow.

**Stacey Sanderson, HR Assistant  
Daikin Applied (UK) Ltd**
